

Pickleball Mixer

Walmart Games 2024

- Thursday, October 17th from 5:45-8:30pm
- Members will sign up as individuals.
- Players will receive a scoresheet with a designated number. By following the card/scoresheet, players will go to their designated court. Players will have new partners/opponents every round and will play 7-8 rounds total. After each round, players will write down their point differential on the scoresheet.
- We will be using rally scoring which means that whichever team wins the rally, wins the point. This differs from traditional scoring, where only the serving team can score points.
 - Scoring: A point is awarded to the winning team after each rally, regardless of which team served.
 - Serving: Player A stands on the right side, player B stands on the left side.
 - Serving order: The winner of the rally serves the next point. If the serving team's score is odd, then player B will serve. If the score is even, then player A will serve.
 - Serving line: The serve must be diagonal and land in the opponent's court past the non-volley zone (kitchen) line. Let serves (ball hits the net on the serve and goes over) are played if they land in the correct court and past the non-volley zone/line.
 - The serving team must allow the ball to bounce once on their side before they can volley (hit the ball out of the air).
 - Returning the serve: The receiving team must let the serve bounce before returning it.
